FF&E – Furniture, Fixtures & Equipment

Onsite or Offsite Logistics Management

- Collaborative development of a logistics program based on the project needs. These services include the receiving of new medical assets, use/updating of Allied's patent-pending software, and preparation of assets for deployment into new facility to prepare the new space to be patient ready
- Manage the expediting of all equipment, IT equipment & furniture ordered
- Project Risk Assessments are provided based on ETAs provided by vendors
- Software to track all purchase orders and status of each item ordered
- Receiving, warehousing, assembly, deployment and installation of all medical equipment to site, so rooms are patient-ready
- Complete chain of custody for control of equipment ordered and mitigation of risk

Facility Management Services

Medical Facility Relocation Planning & Coordination

- Detailed planning with each department
- Web-based software platform with specific department move plan templates
- Meetings with each department to plan each departmental move and to assure all stakeholders have visibility to each piece of equipment relocating
- Move plans to show compliance with health department requirements
- Integration of all support departments into the move plan schedule
- Vendor coordination for equipment that needs servicing and vendor support for its relocation

Decommissioning Services

- Donate, sell, recycle, refurbish, auction and dispose (environmentally-responsible methods)
- Re-purposing of equipment through a web-based platform to order and track
- Terminal cleaning services to prepare old facility for decommissioning
- State mandated certifications for decommissioning with all documentation
- Removal of all items for decommissioning such as batteries, sanitizers, biohazards etc., with process control through an online software platform
